PROFILE SUMMARY

- Passionate about Tech and Software from an early age, started coding as hobby at the age of 15 by developing several hobby projects.
- Have developed several video games, websites, desktop apps, Android native apps, cross-platform Flutter apps, PHP MySQL based back-end and IOT projects.
- Have 8 years of professional experience in App Development, developed several apps from scratch and launched successfully.
- Fully responsible for leading the development, release and maintenance of android apps of my last three companies:
 1. Fizz - Groupon like platform
 2. Fashmates - Fashion social network
 3. Zelish later Tinychef - Meal-planning, Grocery delivery, Recipe discovery app.

EXPERIENCE

Freelancing temporarily, developing book-ads.com,
Freelance Developer

JUNE 2023 – PRESENT

App development at previous company was stopped due to lack of funding, And as funding-winter and layoffs were happening all over the industry, I had decided to freelance and develop this advertisement booking platform

TinyChef (by Chef Sanjeev Kapoor), Remote / Bengaluru.
Senior Mobile Developer

JUNE 2021 – JUNE 2023

After previous startup Zelish got shut-down due to lack of funding, I joined Born group by Tech Mahindra, soon after that i was called by previous employer to join as Zelish is acquired by Tinychef by Celebrity Chef Sanjeev Kapoor,

So i joined and worked till the very end of this company as well, here were my duties

- Gave KT and to new team members of acquired of company, i was go-to-guy for everyone needing any info related to the project
- Mainly worked on building Android native app with new features, also worked briefly on Flutter iOS app and back-end.

PROFESSIONAL SKILLS

Android, Flutter, Core Java, Kotlin, Dart, **Web Services, UI, UX, IOT:** Arduino, ESP, Embedded-C, Photoshop, HTML, CSS, JavaScript, **PHP, MySQL, AWS,** Wireframe, C, C++, **Product Design,** Project Planning, Product Management.

Zelish (Arsara Solutions Ltd), HSR Layout, Bengaluru.

Senior Mobile Developer

DECEMBER 2019 – MARCH 2021

I was the first developer who was part of the core-team, started work from the very beginning and worked until the shut-down and then acquisition. [Zelish](#) was a smart kitchen assistant startup, accelerated by BSH Techstars 2020 batch in Germany.

- Brainstorm ideas with founders, come up with features and break-down features into technical tasks.
- Collaborate with other developers, design team and backend team to develop product from scratch.
- Follow agile methodology, plan tasks for the sprint, execute sprint and deliver features continuously.
- Won 'Best user choice award' from Google Play

Casperon Technologies, Greams Road, Chennai.

Software Developer (Android)

MARCH 2018 – NOVEMBER 2019

I was assigned as lead developer for a dedicated project called Fashmates which is directly managed by the client, [Fashmates](#) is a unique, fun, and rewarding community of fashion lovers who discover, inspire, buy & sell stylish clothing and fashion accessories from each other. **Basically it's a social network for fashion.**

- Lead developer and maintainer, wholly responsible for the Fashmates android app.
- Discuss with the project owner and Scrum master. Analyze, understand and translate business requirements into technical output.
- Fixed the crashes throughout the app, crash-rate changed from 92% to 100% on Crashlytics.
- Worked on memory management and fixed memory leaks, and also worked on performance improvement.
- Used OpenCV image processing to automatically crop images.
- Worked on photo editor, some of the features I worked from scratch include adding text layers, undo redo, save and edit features, creating and showing tags automatically on clothing items in images.
- Created dynamic feeds feature like Facebook home page.

Fizz E-Ventures Pvt Ltd, T.Nagar, Chennai.

Android Developer

JULY 2017 – MARCH 2018

FIZZ is a product-based startup, The FIZZ app is used to discover and purchase discounts across three south Indian cities. *FIZZ unexpectedly paused its operations due to lack of funding*, that's why I left in a short span of time.

- Worked along with founders and staff of all departments to brainstorm and bring new features to the app.
- Solely responsible to maintain, improve and add new features to the Fizz android app.
- Made sure the app is stable by continuously finding and fixing issues and crashes.

Infinit-e Technologies (aka CodeHouse Solutions LLP), Egmore, Chennai.

Mobile Apps Developer

AUGUST 2015 - JUNE 2017

It's a software services cum product company founded by ex-employees of Google & Patni computers. **I developed 7 apps** while working there, 3 of them in a team, 4 of them **I solo from start to end**. Please check the projects section to view those apps.

PROJECTS

Zelish, later TinyChef — Android Native & Flutter iOS App Developer, DECEMBER 2019 – PRESENT

I started working on an Android app from scratch, later joined by a co-developer, I've used Java as well as Kotlin following MVVM architecture. Later I joined with another developer to build an iOS app using Flutter. I have briefly worked on back-end as well.

Android: <https://play.google.com/store/apps/details?id=in.zelish.android>

iOS Beta (Flutter): <https://apps.apple.com/us/app/zelish/id1532575029>

Fashmates — Android Developer, MARCH 2018 – NOVEMBER 2019

I'm grateful to have worked on this challenging project, some of the challenging tasks handled by me include Photo Editor, Image processing, Auto-tagging items, advanced search. It was very fast-paced project, we released more than 100 updates on a year.

Website: <https://www.fashmates.com>

App link: <https://play.google.com/store/apps/details?id=com.fashmates.app>

FIZZ — Android Developer, JULY 2017 - MARCH 2018

Some of the things I worked at Fizz are expanded to multiple cities from one city, fixed lot of bugs, added error handling and reporting. Created notification inbox, re-integrated payment gateway to new server, integrated firebase analytics & made conversion tracking from source of installs, set limit on max coupons a user can buy and lot more.

Working video of App (Because app is removed from PlayStore as company has shut down):

<https://drive.google.com/file/d/1hVKdtbQmcExptVN9L-nwuCWIUw7EVinL/view?usp=sharing>

iCaller — Android and PHP Back-end Developer, ~ 2018

I single-handedly made this project from scratch both front-end (Android native app) and back-end using PHP, MySQL. In this platform users can sign up and create their profile with interests they can find new friends matching their interests and directly video-call them within app. It was made before similar apps which are available today became popular.

Dugar Homes — Android Developer, ~ JUN 2017

This app is made for Dugar – construction company for their partners, to track the availability and sales of apartments.

Klonrr shopping cart — Android Developer, ~ NOV 2016

It's an app based shopping product of the company which is sold to super markets, its functionalities include user registration, searching products, listing products based on category, viewing promotional and offer products, adding products to cart and checkout.

App Link:

<https://play.google.com/store/apps/details?id=in.codehouse.calculus.jks>

ClubApp (now name changed to Klonrr) — Android Developer, ~ MAR 2016

It's one of the products of company, made for clubs to connect members closer. It has features like events with RSVP, Notifications, Chat, Albums, Member details etc... We used to customize and sell it to various clients.

Base App:

<https://play.google.com/store/apps/details?id=com.codehouse.clubappmobile>

One of the client's app:

<https://play.google.com/store/apps/details?id=com.codehouse.jitobangalore>

Bluetooth Based Attendance System — Android Developer, ~ MAR 2016

I built this app for registering attendance on events using Bluetooth, It has a server app for android which Bluetooth signals from nearby Bluetooth devices, and the client app is ClubApp mentioned above, the client can be an Android or iOS device.

CRM — Android Developer, ~ JAN 2016

This app is made for product showrooms to record, view, search & tracks enquiries, customers and much more.

App Link:

<https://play.google.com/store/apps/details?id=in.codehouse.crm.rakhiwala>

People of Change — Android Developer, ~ NOV 2015

Made for NGO called 'Naalaya India', to connect members with NGO's information. Members can login, view live feeds, get list of upcoming events with details, view albums, view and search other charity NGO's, contribute to NGO's by money or time.

App Link:

<https://play.google.com/store/apps/details?id=in.infinite.peopleofchange>

Travllr — Android Developer, ~ AUG 2016

It's an app which acts as digital interactive itinerary for tourists.

App Link:

<https://play.google.com/store/apps/details?id=com.infinite.travelguide>

Share Apps — Android Developer, ~ NOV 2014

My first app launched on PlayStore when I was studying college, It's a Unique featured (at that time) app sender with fastest loading, Sends apps as APK or link, also backup and manage apps. **It also has over 100k downloads and over 900 ratings.**

App Link: <https://play.google.com/store/apps/details?id=app.myappsender>
